DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance: claims 1-21 present allowable subject matter over the prior art since the prior art teachings do not teach of a cardiac rhythm management device and method that delivers paces to both the right and left ventricles at a programmed biventricular offset interval and after a programmed AV delay interval with respect to an atrial event, then switches to left ventricle only pacing mode while recording an evoked response test electrogram, then compares the test electrogram to an evoked response template electrogram previously recorded during left ventricle only pacing, then adjusts the programmed AV delay interval to match the patient's current intrinsic AV interval and then returns to the biventricular pacing mode with the adjusted AV delay interval.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Maarse (U.S. Patent No. 6,128,535), Lu (U.S. Patent No. 6,697,673), Sloman et al. (U.S. Patent No. 6,738,669), Kroll (U.S. 2001/0049543).
